Nicolás Tapia Sanz

Unity3D Developer | C# / .NET (Unity) | Tools, Games & Visualization

With over five years of professional experience as a **Unity3D developer**, I have worked on a wide range of projects, including architectural and engineering tools, BIM visualization tools for Revit, Unity-integrated tools, and game development (first-person, puzzle, and strategy games), as well as software architecture. My work is primarily focused on **Unity and C#**, leveraging the **.NET ecosystem within game and real-time applications**. In some projects, I have also taken on **supporting backend development tasks in .NET**, gaining a **working knowledge of backend concepts** when required by the project. Beyond hands-on development, I have led small multidisciplinary teams, managing programmers, designers, and artists, and mentoring university interns. I have experience working with agile methodologies (Scrum), waterfall development, and test-driven development (TDD). In parallel with my professional work, I am also a lecturer in *Introduction to Game Programming*.

PROFESSIONAL EXPERIENCE

UDIT University (Remote Work - Madrid, Spain)

September 2025 - Current

Developer

- Development of **CyCompliance**, a Unity3D WebGL digital twin for cybersecurity and compliance training for Factum S.L., using **Azure Cloud, Functions, and DevOps**.
- **Development of technological research projects** within the Vice-Rectorate for Research
- **Implementation** of features and system architectures using **Unity3D** and **.NET ecosystem** (including **ASP.NET** for endpoint and service development in **Azure Cloud**).
- **Technical decision-making**: engine selection, technology stack choices, backend frameworks, and overall architectural guidance. **Planning and coordination** of R&D projects, managing timelines, deliverables, and communication with clients.
- **Collaboration** with developers and researchers across university departments.
- **Technical coordination of assigned projects**, ensuring alignment between the team and project objectives.

Lecturer at Games Design & Development Bachelor's Degree:

- Lecturer of *Introduction to Game and Virtual Environments Programming*. September 2024 - August 2025
- Adjunct lecturer of *Artificial Intelligence & Advanced Artificial Intelligence*. September 2024 - August 2025
- Lecturer of a Virtual Reality master Class. October 2019

Lurtis Rules, S.L. (Remote Work - Madrid, Spain)

December 2019 - March 2025

Unity3D and .NET Developer.

- **Development of 3D Applications**, including **Kitchen Designer**, a 3D visualization plugin for Revit with **Unity3D** using **HDRP**; **Buidability**, a land development analysis tool for construction companies with Unity3D; and a renewable energy project viewer for **Oculus Quest 3** with **Unreal Engine 5** for CWP Global.
- **Game development**, focusing on **gameplay and UI programming**; including **ZPLN**, an arcade game for Zenduja Corp for mobile devices with Unity3D; **Forsaken Empires**, an unannounced RPG-strategy game for Android and iOS with **Unity3D** in **URP**; and **Kumal**, a Unity3D-integrated tool for generating environments using **UI Toolkit**.
- **Libraries development** in **.NET Core**, **.NET Standard**, and **.NET Framework** alongside teammates. Designed and implemented software architectures following **MVC**, **MVVM**, and **MVP** patterns. Worked with third-party libraries for Excel and Word documents generation. Explored **ASP.NET** development for backend services, gaining a basic understanding of **ORM** tools like **Entity Framework Core**, and **GraphQL** with **HotChocolate**. Additionally, handled **NuGet** packages, including their creation and integration. Experience with Newtonsoft for JSON serialization/deserialization and in **Test-Driven Development (TDD)**, applying it to various projects to enhance code reliability and maintainability (using **NUnit** and **xUnit**).
- **Software architecture improvements**, including **design patterns**, **automation** of internal compilation processes, and **CI/CD** with **Jenkins** and **Sonarqube**. Additionally, developed **Python and Bash scripts** primarily for automation and project cleanup.
- **Unity Package Management**, developing a private package management system for Unity projects using **Verdaccio**, enabling the sharing of assets, code, and tools across multiple projects.
- **Code review and integration**, managing **pull requests** and merges with **Git**, ensuring code quality and best practices: **Clean Code** and **SOLID**, **YAGNI**, **KISS** and **DRY** principles.
- **Project and team supervision**, supervising a team of two developers and two artists in game projects, while also coordinating teams of up to five interns. Implemented **Scrum** as project management methodology, ensuring successful project completion through **ClickUp**, after an initial phase with **Jira**. Developed internal documentation with **Confluence** to streamline processes within the team.

INTERNSHIPS

Observatorio Español del Diseño, S.L. (Madrid, Spain)

December 2017 - November 2018

Unity3D Developer. Research project on real-life pedestrian accidents in VR, developed in Unity.

Gammera Nest, S.L. (Madrid, Spain)

July 2016 - September 2016

Game Designer. Level and narrative design for **Nubla 2**, an exclusive PS4 game.

TECHNICAL SKILLS

Programming Skills	Professional Knowledge - Unity3D - UI Toolkit - AR - VR - DoTween - Profiler - Shaders - Cinemachine - Addressables - Assembly Definitions - URP - HDRP .NET Core / .NET Framework / .NET Standard - C# (LINQ, Async/Await, Dependency Injection, Newtonsoft) - Git (Bash, GUI) + Submodules + LFS - NuGet Package Management	
	Mid Knowledge - Unreal Engine - Bash - VR - AR - ORM (EF Core) - GraphQL (HotChocolate) - MongoDB - Firebase	Basic Knowledge - ASP.NET - Python - Jenkins - Sonarqube - C++ - OpenGL - Swift - Arduino
Soft Skills	Clean Code, Design Patterns, Scrum, TDD, SOLID, YAGNI, KISS, DRY	
Professional Software	Visual Studio 2026, ReSharper, Jira, ClickUp, Confluence, Trello	
Operating Systems	Windows, Mac and Linux	
Languages	Spanish: Native Language English: Fluent	
Other Software	Office, 3Ds Max, Photoshop, Illustrator, DaVinci Resolve, Notion, BIM	

ACADEMIC EDUCATION

Game Design & Development Bachelor 's Degree. UCJC (Madrid, Spain).

2015 - 2019

- Mention in Programming. (8,86)
- PlayStation First Program: April 2017 - May 2017. Use of PS4 DevKit.
- Support Staff at ESNE Stand in AULA Event: 2017, 2018 and 2019.

Computing Engineer Degree. Universidad Complutense de Madrid (Madrid, Spain). (Not finished).

2013 - 2015

OTHER EXPERIENCE

MareTown (Solo Development). PC game developed in Unity3D. Still in progress.

January 2025 - Current

Unknown Outcome (University Games Studio). Producer, Designer, Programmer, BizDev & PR.

February 2017 - July 2019

Development of **Emergency Room**, a PC game developed with Unity3D which was part of the PlayStation First program; and **Dead Science**, a PC game developed with Unreal Engine 4 and showcased at Spanish game events

Warren Of Love (University Ludum Dare 41 Gamejam). Programmer and Musician. PC game in Unity3D.

May 2018

Crisantemo (University Games Studio). Mechanics & Tools Programmer in Unity3D editor.

2017

Just Dream (University Games Studio). Programmer, Designer and Producer. Mobile game in Unity3D.

2016

Gravity Cube (Solo Development). Mobile game developed in Unity3D available at Play Store.

2015

HOBBIES AND INTERESTS

- Running, Trekking, Skateboarding, Surfing.
- Board and Video games, Reading, Cinema, Culture, Art, Investment, Entrepreneurship, Electric Guitar, Photography, 3D Printing and Video Editing.
